

## CCFE Advisory 2008-12

**April 10, 2008**

**Re: CCX Trading Platform System Changes to Occur on April 18, 2008**

Effective April 18, 2008, the CCX Trading Platform will be migrating to a new data center location. As a result, the following technical information should be reviewed for compliance with firewalls and proxy servers so participants can continue to access the CCX Trading Platform without interruption.

### PRODUCTION ENVIRONMENT:

Allow access to both \*.chicagoclimatex.com and \*.chicagoclimateexchange.com. To connect into the CCX Trading Platform (Production Environment) users must have (at a minimum) access to the specific hosts listed below:

### WEBSERVERS

- app.chicagoclimatex.com (serves the .jar files for the trading platform)  
63.247.112.6  
Ports: 80/443
- Cluster1    webice1.theice.com    63.247.112.129    63.247.112.130    63.247.112.131
- Cluster2    webice2.theice.com    63.247.112.132    63.247.112.133    63.247.112.134
- Cluster3    webice3.theice.com    63.247.112.135    63.247.112.136    63.247.112.137

Multiple clusters are provided to allow for upgrades to new versions of the CCX Trading Platform and/or new Platform specifications. Access to each cluster should be provisioned through any firewall.

Additionally, users must have access to each of the following services:

### CREDIT FILTER, CLEARING ADMINISTRATOR, and DEAL REPORTS

- cp.chicagoclimatex.com.com  
63.247.112.18            Ports: 80/443
- reports.chicagoclimatex.com.com  
63.247.112.20            Ports: 80/443

Further Details on the CCX Trading Platform System Requirements are available at the following url:
