

CCFE Advisory 2009-02

January 22, 2009

Re: CCFE Options Trading Platform v3.5 Upgrade – Required End-User Software

Effective Friday, January 30, 2009, CCFE will upgrade its Options Trading Platform to version 3.5. This update will require Java version 1.6.0 or later be installed on any trading terminal accessing the Options Trading Platform. To ensure continued connectivity, options traders are encouraged to contact their IT support staff or the CCFE Options Trader Support desk, at (212) 962-8206, to ensure their computers are running the correct java version.

Last year, the CCFE Futures Trading Platform was upgraded to support Java version 1.6.0 or later. Therefore, futures traders are unaffected by this change. API users are also not affected.

The latest version of java is available for download at <http://java.com/en/download/>
